2017-2018 Fall Student Evaluation Of Instruction Report

Individual Course

Course Information Course Subject & Code : BIO 466
 Course Name : Biophysics: Molecules and Sys.
 Instructor : Deniz Sezer (dsezer)

Enrollment : 8
 No of responses : 4
 Response Rate : 50%

Student Information

	0.0-0.99	1.00-1.99	2.00-2.99	3.00-4.00

Question: What recommendations do you have for this course or instructor? What could the instructor do better or differently to better help you learn?

- Because my mathematical and physics background isn't so strong, I was slower at absorbing the math than other students so maybe it would have helped if he was just a little bit slower but it wasn't a big deal because I could always get my queries resolved eventually.
- None.

Question: What were the least useful aspects of this course, in your opinion (such as course content and structure)?

- The final presentation and report.

Question: What were the most useful aspects of this course, in your opinion (such as course content and structure)?

- This was the most interesting course that I took this semester, albeit the hardest. The teacher himself was really great and I liked how he taught the class. The class was original and discussion based which allowed me to learn much more than my other courses where teachers just put things on slides and read them.
- For me, the most useful aspect of this course was the instructor involving us in every step. This really increased my enjoyment of the course and I learned more at a faster rate.

Question: What would you like other students to know about this course?

- It is a challenging course but the teacher is really great so its worth giving it a shot!
- It's fun and challenging (in a fun way)
