EXECUTIVE SUMMARY

Beginning of his career with the founder and supervisor of Industrial Engineering Department in Textile sector, Emin has shifted to the Automotive sector and taken part in sub-branches of Supply Chain Management at TIRSAN. During 15 years Supply Chain expertise with last 7 years in Managerial position at TIRSAN and TKG, Emin has been using SAP ERP tool and LEAN Management Science.

In terms of change leadership and strategy generation, Emin has been pioneering and challenging his organization. Both at TIRSAN and TKG, especially based on digital transformation trend, he has eagerly lead improvement projects. In addition to this attitude, he has established FMEA and RISK management systems with the aim of improving his team sense of vision and risk. Emin takes cognizance of team management and allows time for personal competence development by Justice and Respect leadership manner. By goals and competency-based management principles, Emin organizes weekly team meetings to coordinate proceed on projects and organizes quarterly individual meetings for personal competence development on the basis of the achievements of the “Fundamentals of Leading” trainings from DDI and “SLII Situational Leadership” studies of Blanchard Academy. By those methodologies, Emin and his team received the title of the most successful department in the last 5 years at TKG. Nowadays, he is also leading TKG new plant construction.

ACCOMPLISHMENT

2020 – Annual inventory turns KPI improved from 21Days to 13Days in 4 years

2020 – Total Cost saving achieved 595K € in 5 years

2020 – Deviation rate of Inventory improved from %2.4 to %0.3 in 5 years

2019- Global Supply Chain : As the project leader, we have visited Middle and North Europe. We prepared the feasibility report and received management approval for the new plant investment in Czech Republic and Warehouse partnership agreement in France in order to locate closer and serve Automotive OEM's

2018- Automated Guided Vehicle (AGV) system implemented: We have searched and invested an AGV in Internal logistics operation. ROI of the project is 7 months and saved 3 labor (~%15) workforce.

2018- Internal Logistics Sub-Part preparation and feeding System: In terms of JIT feeding and field gain strategy, SAP® based and ProManage® production schedule integrated system provides internal logistics team sub-part preparation timeline on RFID.

2018 – Logistics Performance Management System: We have improved a new SAP® handling performance module and saved 9 labor (~%20) workforce.

2017 – Supplier Performance & Risk Assessment System

2016 – TKG Internal Logistics Organization Foundation

2016 – TKG Purchasing Agreements Prepared

2015 – FMEA in Supply Chain

2014 – Supply Chain Manuel Handbook

2013 – Raw Material Resale Portal via vSRM: We have developed a raw material Resale module via portal provider partner vSRM on web portal which can collect material demands from Tier1 suppliers and compare with Bill of Material properly and serve the demands for Procurement from producers. It was a change leadership for the organization which could not determine raw material requirements.

2012 – ooBEYA Room & Team Establishment: As the leader of the cross functional organization, we have built the ooBEYA room and prepared its standards. Process and KPI's..

2011 – Supplier Portal via vSRM: We have launched Web based Supplier Portal with 60 local suppliers.

2010 – Supply Chain Standarts, Strategies, Score-Cards

2009 – Tirsan Milkrun SAP Modul and Logistics Team Estb. : In 4 different regions, we have visited high-volume suppliers and launched Milkrun material collection system. It has been reflected and improved on SAP® by using our conceptual design. We have been honored as the team of Kaizen of the Year.

2007 – SAP MM Modul Establishment
