A group of people are captured in mid-air, jumping joyfully on a beach at sunset. The silhouettes of the jumpers are set against a vibrant orange and blue sky. In the foreground, a yellow sticky note is pinned to the image with a red pushpin. The note contains the text "JUMPIN' for JOY". The background shows the beach and the ocean, with other people visible in the distance.

Obesity

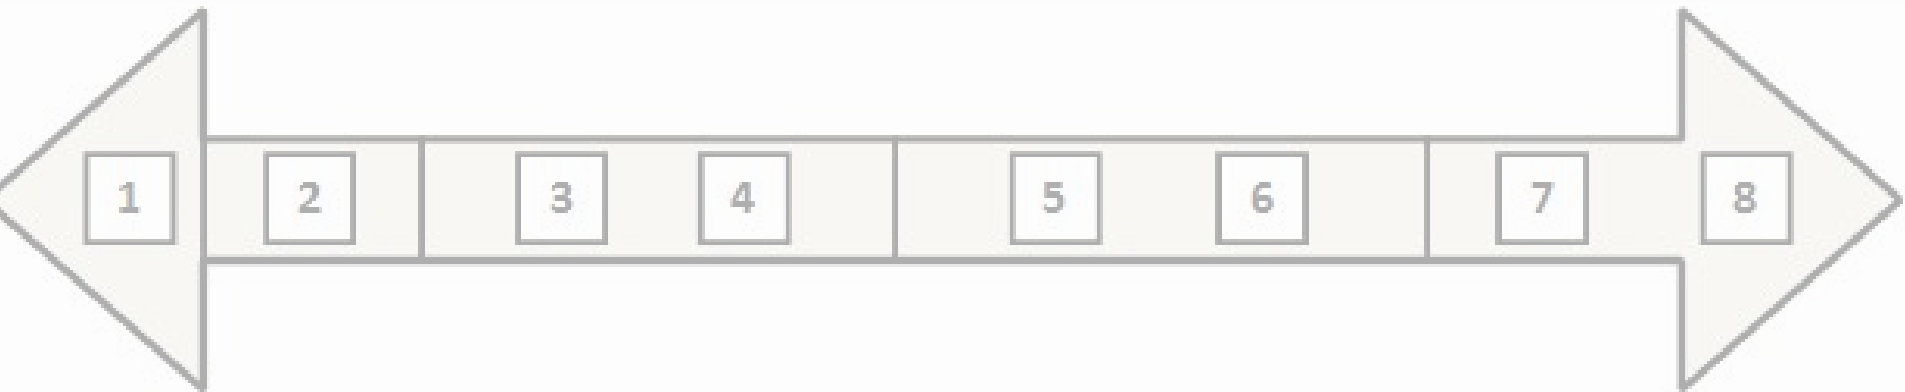

By: Oyku O.

May 15, 2012

The purpose of this paragraph is to inform an academic audience of the author's opinion and argument.

Obesity is increasing because of poor nutrition education and unhealthy food choices in the school.

Have you noticed that children are getting fatter? Children don't have enough education about the nutrition. They are not aware of that they're eating risky food. Bad nutrition increases with age and the puberty period is a risky period for it. Therefore there should be eating lessons in schools. Moreover, schools give the wrong message by selling unhealthy food. For example, in our school, you can buy biscuits, chocolate and sausages yet the school still teaches us not to eat them. It's like putting cheese in front of the mouse and saying, "Don't eat that". Obesity increasing because of the ignorance. The societies, especially children, should learn more about it. At this point, schools have lots of work to do. They can make lessons about eating habits and stop selling junk food.

There was an internet browser called Internet Explorer. He was the most popular internet browser. Everyone is getting help from him.

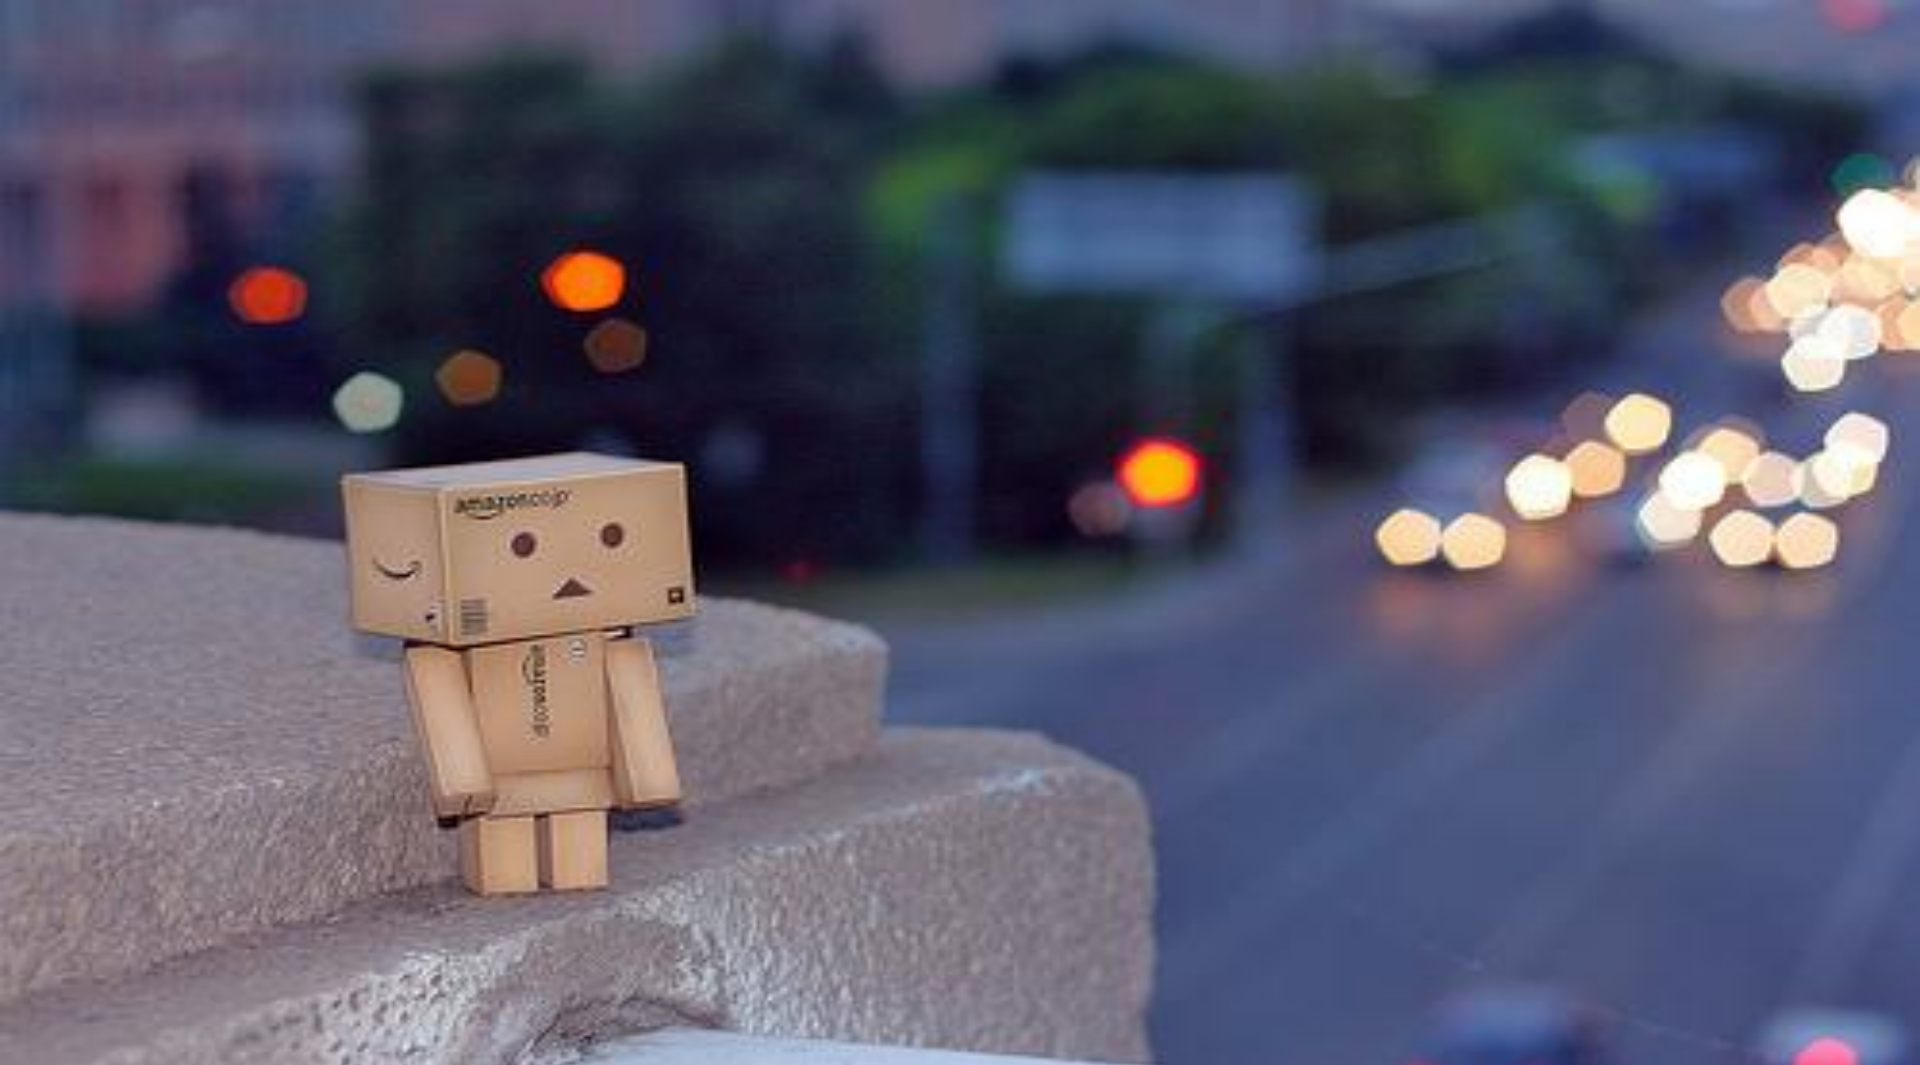

Then a group of internet browsers came and their names were Mozilla Firefox, Google Chrome, Opera and Safari. They were always teasing him because they were faster.

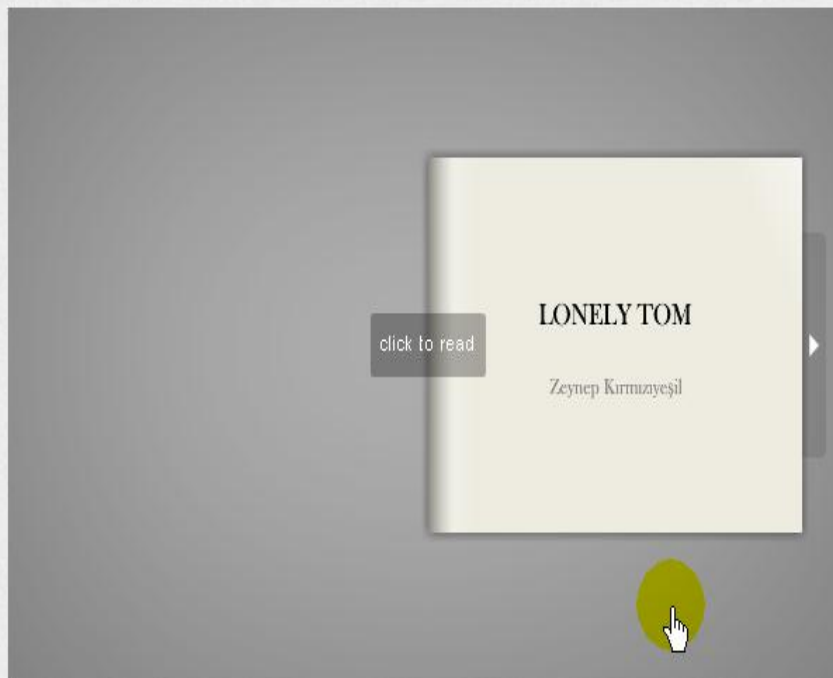

Everyone stopped using Internet Explorer, and started to use other internet browsers. Internet Explorer felt very lonely and sad.

In the end, the other internet browsers went bankrupt, and Internet Explorer became popular again.

At the end of each month, students self-assess their progress based on the HH- EF skill-based criteria. They are then interviewed by the class teachers and an agreement is reached with regard to their English level.

Each criterion is graded from 0 to 5.

Our exit criteria is level B2 with an average of 4.0 over the 8 months. Students who reach this skills level in English are more likely to cope with the higher academic demands in high school.
