Random Real Algebraic Geometry Summer School

Nesin Mathematics Village, 11-15 August 2025

Mini courses offered by

Alp Bassa (Boğaziçi University)
Turgay Bayraktar (Sabancı University)
Özgür Kişisel (Middle East Technical University)
Özcan Yazıcı (Middle East Technical University)

We invite senior undergraduate and graduate students to apply for the Summer School on Random Real Algebraic Geometry. This program offers an introduction to a rapidly developing field at the intersection of algebraic geometry, probability, and mathematical physics. Participants will engage with lectures by experts, problem sessions, and discussions aimed at developing both foundational understanding and research-level insight. Students with a strong interest in geometry and probability are especially encouraged to apply.

For application: https://forms.gle/LxZTAKJvHKyoqjui9
